

1. A set of rules and standards in society that keep individuals bound to use formalised mechanisms is:
A) Social change B) Social control
C) Social conflict D) Social culture
2. The Father of Mental health is:
A) Hippocrates B) Emil Kraepelin
C) Sushruta D) Benjamin Rush
3. The following are anaesthetic drugs **except**:
A) Midazolam B) Propofol C) Halothane D) Ketanov
4. Identify the causes of renal failure:
1. Diabetes 2. Hyper-Tension 3. Glomerulo Nephritis
A) 1 & 2 only B) 2 & 3 only C) 3 only D) 1, 2 & 3
5. An oral hypoglycemic drug is the following **except**:
A) Diuril B) Metformin C) Daonil D) Glipizide
6. Which of the following is **not** a responsibility of a Head Nurse:
A) Policy making B) Direct patient care
C) Supervision D) Material inventory
7. Which patient assignment is suitable in an ICU?
A) Modular nursing B) Task focused
C) Primary Nursing D) Case method
8. Principles of good teaching and learning are:
A) Organizing knowledge B) An active learning Environment
C) Timely feedback D) All the above
9. All are Visual aids **except**:
A) Flip chart B) Whiteboard
C) Tape-recorder D) Power point
10. Trained Nurses Association of India was established in:
A) 1902 B) 1908 C) 1905 D) 1915
11. Which is the normal pacemaker of the heart?
A) Purkinje fibre B) SA Node
C) His bundle D) AV Node

12. Pulmonary arteries carries:
 - A) Oxygenated blood to lungs
 - B) Deoxygenated blood to lungs
 - C) Oxygenated blood to heart
 - D) Deoxygenated blood to heart
13. Which part of a Neuron carries impulses towards cell body?
 - A) Axon
 - B) Nerve fibre
 - C) Dendrites
 - D) Myelin sheath
14. Glandular epithelium is seen as:
 - A) Tissue covering
 - B) Inner lining of bladder
 - C) Inner lining of GIT
 - D) Inner lining of respiratory tract
15. Patella is an example for:
 - A) Short bone
 - B) Sesamoid bone
 - C) Flat bone
 - D) Irregular bone
16. The lobe of brain associated with vision:
 - A) Temporal
 - B) Occipital
 - C) Frontal
 - D) Parietal
17. Gall bladder is located at:
 - A) Underneath of Liver
 - B) Left to liver
 - C) Underneath of stomach
 - D) Lateral to stomach
18. Decreased Oxygen in the tissue is termed:
 - A) Hypoxaemia
 - B) Anaemia
 - C) Asphyxia
 - D) Hypoxia
19. Which of the following is **not** a neurotransmitter?
 - A) GABA
 - B) Serotonin
 - C) Dopamine
 - D) Melanin
20. Abnormal respiration are the following **except**:
 - A) Biot's
 - B) Kussmaul's
 - C) Cheyne stokes
 - D) Flutter
21. Immunoglobulin associated with helminthic infestation is:
 - A) IgG
 - B) IgE
 - C) IgD
 - D) IgA
22. Cerebro spinal fluid is produced by:
 - A) Brachial plexus
 - B) Middle cerebral artery
 - C) Choroid plexus
 - D) Pial veins
23. The Vector in Dengue fever is:
 - A) Culacine
 - B) Aedes aegypti
 - C) Anophilus
 - D) Mansonoides

24. Sudden episode of intense fear or anxiety and physical symptoms are seen in:
 A) Anxiety B) Panic attack
 C) Fear D) Obsessive compulsive disorder
25. A toddler ages between:
 A) 0 - 1 year B) 3 - 5 years C) 1 - 5 years D) 2 - 5 years
26. The milestone fine motor skills at 2 years, does the following **except**:
 A) Hold a Toy B) Hold a spoon and eat with it
 C) Try to feed by self D) Scribble with a pencil
27. Which muscle is a site for intramuscular injection in an infant?
 A) Gluteus maximus B) Vastus lateralis
 C) Gluteus medius D) Deltoid
28. The dosage and route of Measles vaccination is:
 A) 0.05 ml S/C B) 0.1 ml S/C C) 0.5ml S/C D) 0.1 ml I/M
29. Which one below is a Vector borne disease?
 A) Diarrhoea B) Typhoid
 C) Filariasis D) Covid Pandemic
30. All the following are Sexually Transmitted diseases **except**:
 A) HIV B) LGV C) Gonorrhea D) Pemphigus
31. Kernicterus is jaundice with high levels of bilirubin enough to cause brain damage in:
 A) Newborn B) Adult
 C) Pregnant mother D) Older adults
32. Which of the following drug is **not** used in Anaphylactic reaction?
 A) Epinephrine B) Albuterol
 C) Diphenhydramine D) Meropenom
33. Health Care Associated Infections are the following **except**:
 A) CAUTI B) VAP C) UTI D) MRSA
34. Which are the infection control practices in hospitals?
 1. Standard precautions and safe disposal of waste
 2. Sterilisation
 3. Hand hygiene and Disinfection
 4. Safe injection practices
 A) 1 & 2 only B) 3 & 4 only C) 1 & 4 only D) 1, 2, 3 & 4

35. Elementary health services at village level is rendered through:
 A) ASHA workers B) Village health guides
 C) Anganwadi workers D) All the above
36. National Rural Health mission was launched in:
 A) 2002 B) 2010 C) 2005 D) 2008
37. An antiseptic mouthwash used for oral care is:
 A) 1 % Chlorhexidine B) 2 % Chlorhexidine
 C) 0.9 % Normal Saline D) 0.2 % Chlorhexidine
38. Which defect can occur in a newborn due to Folic acid deficiency in the mother in early pregnancy?
 A) Cardiac defects B) Limb defects
 C) Neural tube defects D) Lung defects
39. Normal protein intake required for a woman during pregnancy:
 A) 55 gm/day B) 70 gm/day C) 65 gm/day D) 80 gm/day
40. The best source of Vitamin D:
 A) Meat B) Fish C) Sunlight D) Pulses
41. Normal water intake required for an adult in a day:
 A) 1 litre B) 2.5 litres C) 1.5 litres D) 3.5 litres
42. The test used to detect Typhoid fever:
 A) VDRL B) Western blot
 C) Widal D) Precipitin
43. Kwashiorkor and Marasmus are malnutrition in children due to deficiency of
 A) Carbohydrate B) Protein
 C) Fat D) All of these
44. Which of the following is a predictor of HIV progression?
 A) Viral load B) Reducing CD4 count
 C) P24 antigen D) Deteriorating health
45. The isolation of a person to prevent spread of infection is termed:
 A) Surveillance B) Barrier Nursing
 C) Quarantine D) Reverse barrier Nursing
46. HbA1C is an indicator of:
 A) Haemoglobinemia B) Glycosylated haemoglobin
 C) Oxyhaemoglobin D) Carboxy haemoglobinaemia

58. How many drops Oral Polio vaccine is given for a child in one time?
 A) 5 drops B) 1 drop C) 4 drops D) 2 drops
59. The following are Cold Chain equipments to maintain Vaccine potency **except**:
 A) Ice Lined Refrigerator B) Cold box
 C) Deep freezer D) Cold bowl
60. Which among the following one is **not** a Sign and symptom of hypersensitivity reaction?
 A) Hives and itching B) Thrombocytopenia
 C) Anaemia D) Redness and shortness of breath
61. A process of destroying all microorganisms including spores is:
 A) Disinfection B) Tyndallization
 C) Pasteurisation D) Sterilisation
62. The drug used to treat Leprosy:
 A) Clonidine hydrochloride B) Chlorambucil
 C) Clofazimine D) Lamivudine
63. Reticular Activating system is located in:
 A) Cerebrum B) Cerebellum
 C) Brain stem D) Parietal lobe
64. Dane particle is associated with:
 A) HIV B) HCV C) HBV D) HDV
65. Deficiency of Vitamin D in adults results in:
 A) Osteomalacia B) Rickets
 C) Osteoporosis D) Gout
66. Which among the following is **not** an enzyme in gastric juice?
 A) Pepsin B) Lipase C) Renin D) Trypsin
67. Which of the following is **not** a symptom of kidney failure?
 A) Edema B) Colicky pain
 C) Elevated blood pressure D) Oliguria
68. Morning preparation of a person posted for Appendix surgery includes the following, **except**:
 A) Nothing per oral B) Enema
 C) I.V fluids D) Antibiotics
69. Which among the following is **not** used for Nebulisation?
 A) Salbutamol B) Ipratropium C) Pancuronium D) Budecort

70. Which Warning sign indicates laryngeal cancer?
 A) Dysuria B) Bleeding
 C) Hoarseness of voice D) Nagging cough
71. Normal female pelvis is:
 A) Platypelloid B) Gynaecoid C) Android D) Anthropoid
72. Normal position of foetus in the uterus is:
 A) LOA B) ROA C) LOP D) ROP
73. Which one below is **not** an indication for LSCS?
 A) CPD B) Maternal co morbidity
 C) Fetal distress D) LOP position
74. Drugs used for improving uterine contraction are the following **except**:
 A) Methergine B) Ethionamide
 C) Oxytocin D) Prostaglandin
75. A Chocolate cyst is associated with:
 A) Uterus B) Ovary
 C) Fallopian tube D) Cervix
76. Which of the following is a Cancer marker?
 A) Fetoplacental Antigen B) Beta HCG
 C) CEA D) HCG
77. A tumor in the uterus as a result of non viable pregnancy is:
 A) Fibroid B) Endometriosis
 C) Molar pregnancy D) Endometrial tumor
78. Which of the following is **not** a Cancer chemotherapy drug?
 A) Vincristine B) Methotrexate
 C) Bleomycin D) Dicarbamine
79. Immediate complications following 60% thermal burns are the following **except**:
 A) Hypovolemia B) Pain
 C) Shock D) Contractures
80. First aid for dog bite includes the following **except**:
 A) Make person to relax and be calm
 B) Wash wound thoroughly with soap and water
 C) Use antiseptic solution and cover
 D) Transport the person to hospital

81. Which of the following is **not** a preventive device of Decubitus Ulcer?
A) Alternating Pressure mattress
B) Stryker beds
C) Air filled mattress
D) Wheel chair cushion
82. An immature way of responding to stress:
A) Repression
B) Rationalisation
C) Regression
D) Sublimation
83. How many fluid drops per minute is adjusted to complete 2000 ml of glucose saline to infuse over 24 hours?
A) 12 drops B) 18 drops C) 24 drops D) 22 drops
84. Normal respiration is termed:
A) Apnea B) Eupnea C) Hyperpnea D) Tachypnea
85. A contra indication to insertion of a nasogastric tube is
A) Unconsciousness B) Disorientation
C) Basal skull fracture D) Dysphagia
86. An intermediate acting insulin is:
A) NPH B) Huminsulin C) Regular D) Aspart
87. Which following complication is **not** associated with diabetes ?
A) Retinopathy B) Neuropathy
C) Hyperglycemia D) Haemoglobinopathy
88. In which disorder, Intraocular pressure is elevated?
A) Cataract B) Blepharitis
C) Glaucoma D) Conjunctivitis
89. An example of a Mydriatic drug:
A) Homatropine B) Pilocarpine
C) Ciplox D) Diamox
90. A refractive error of eye, where image of close objects appear out of focus is:
A) Astigmatism B) Myopia C) Hyperopia D) Presbyopia
91. The bones that helps in conduction of sound waves from outer to inner ear are located in:
A) External ear B) Middle ear
C) Inner ear D) None of these

92. Bleeding from Nostrils is termed:
 A) Haematemesis B) Epistaxis
 C) Haemoptysis D) Variceal bleeding
93. Which drug below controls bleeding following tonsillectomy?
 A) Tranexamic acid B) Octreotide
 C) Ethamsylate D) Vitamin K
94. First aid for a person met with RTA, includes following **except**:
 A) Rescue victim from site, supporting injured area
 B) Help victim to relax and calm
 C) Control bleeding
 D) Wait for relatives to come and send to hospital
95. An antidote for organophosphate poisoning is:
 A) Atropine B) Protamine C) Adrenaline D) Sorbitol
96. Which following condition is **not** a neurotic disorder?
 A) Depression B) Delusion C) Phobia D) Anxiety
97. The following are antipsychotic drugs **except**:
 A) Clozapine B) Risperidone C) Olanzapine D) Lorazepam
98. Lithium carbonate is used in the treatment of following **except**:
 A) Mania B) Depression
 C) Bipolar disease D) Schizophrenia
99. Measles vaccine is stored at a temperature of ----- degree Celsius.
 A) 2 - 4 B) 2 -8 C) 4 -6 D) 4 - 10
100. Fear of Flying is:
 A) Acrophobia B) Aquaphobia
 C) Aerophobia D) Claustrophobia

Question Booklet Version:

A

Qn. Booklet No:

22019

Roll Number:

--	--	--	--	--	--	--	--

INSTRUCTIONS TO CANDIDATES

1. Read the instructions given on the back of the OMR Sheet / Admit Card carefully and fill the OMR sheet. OMR sheet not correctly filled in will not be valued.
2. Use only black/blue ink ball point pen to fill in the OMR sheet.
3. Write your Roll Number (all eight digits) and Version as **A** on the Question Booklet and on the left hand side of the OMR sheet (basic data part).
4. The examination consists of 100 Objective type multiple choice questions, which are to be answered in 90 minutes.
5. After opening the Question Booklet, ensure that there are 100 Questions and that the printing of all the questions are legible. If there are any missing or illegibly printed questions, the matter may be reported to the Invigilator immediately.
6. There are 4 options (A, B, C & D) for each objective type question. Mark the most appropriate answer corresponding to each question by blackening fully the corresponding bubble in the OMR sheet with a black/blue ink ball point pen. **For every correct answer 1 mark will be awarded. No deduction of mark will be made for unanswered questions and wrong answers.** Marking of more than one bubble against a question number in the OMR sheet shall be considered as an incorrect answer. Erasing, overwriting, partial marking, etc. shall also be treated as incorrect answer.
7. Rough work and calculations can be made in the blank pages attached to the question booklet. Watch, Calculator, Mobile phone, Electronic instruments etc. shall not be allowed in the examination hall.
8. The OMR Sheet and the Hall Ticket should be returned to the Invigilator. The Counterfoil of the Hall Ticket and Question Booklet can be retained by the candidate after the examination.
9. Answer keys will be published in the website **www.lbscentre.kerala.gov.in** after the examination. Complaints, if any, from the candidates regarding the questions, responses / probable answer may be sent to the Email id **ddcc.lbs@kerala.gov.in** **before 5.00 PM within three calendar days** from the date of publication of the answer keys. Complaints not substantiated with supporting documents will not be considered. However the decision of the experts regarding such complaints on the answer keys shall be final.
10. The Answer sheet of candidates who indulge in malpractice in any form shall not be valued.
11. The candidates will be allowed to leave the hall only after the completion of the examination time and after handing over the Answer sheet to the Invigilator.

1. A nurse establishes therapeutic relationship with the patient. The nurse understands that the following are therapeutic impasses except:
A) Resistance B) Self awareness
C) Transference D) Counter transference
2. The factors that aggravate or prolong the course of mental illness is referred to as:
A) Predisposing factor B) Precipitating factor
C) Predominating factors D) Perpetuating factors
3. Which of the following is a negative symptom of schizophrenia?
A) Attentional impairment B) Delusion
C) Hallucination D) Autistic thinking
4. A client receiving Monoamine Oxidase Inhibitor (MAOI) presented with palpitations, nausea, vomiting and occipital headache. She also reported heavy intake of cheese and soya sauce. She might have developed -----.
A) Neuroleptic Malignant Syndrome
B) Hypertensive crisis
C) Tardive dyskinesia
D) Serotonin syndrome
5. The type of learning which is used in solving puzzles or in problem solving:
A) Insight learning B) Observational learning
C) Trial and Error learning D) Learning by doing
6. A person has brought a new phone, but he has difficulty in using new one, because method of operation was different in his old phone. The reason for this is
A) Retroactive interference B) Proactive interference
C) Fading D) Displacement
7. The nurse adopts some shortcut measures to make an elderly woman to take medicine, who was reluctant to take medicine. The type of problem solving used is:
A) Insightful solutions B) Reasoning
C) Heuristics D) Trial and Error method
8. A nurse uses aggressive communication with low regard to relationship, which is useful in emergency situation. This type of conflict resolution is:
A) Accommodating B) Collaborative
C) Comprising D) Competitive
9. High concentration of oxygen is injurious to premature babies due to the risk of developing -----.
A) Hyaline membrane disease
B) Retinopathy of Prematurity
C) Anemia of prematurity
D) Tracheo esophageal fistula

21. In a patient who has just undergone total thyroidectomy, a nurse should carefully assess:

A) Depressed reflexes	B) Weight gain
C) Confusion	D) Positive chvostek's sign
22. The action of glycopyrolate which is given as a preoperative medication is ----.

A) Increase gastric pH	B) Decrease oral and respiratory secretion
C) Increase gastric emptying	D) Reduce anxiety
23. The most common cause of post operative hypoxemia:

A) Airway obstruction	B) Atelectasis
C) Pulmonary edema	D) Aspiration
24. Infection of lacrimal sac of eye:

A) Blepharitis	B) Dacrocystitis
C) Hordeolum	D) Chalazion
25. Death of tissues associated with loss of blood supply:

A) Gangrene	B) Eczema	C) Cellulitis	D) Hematoma
-------------	-----------	---------------	-------------
26. A fungal infection of the skin:

A) Plantar warts	B) Tinea corporis
C) Furunculosis	D) Impetigo
27. A dermatologic manifestation of Cushing's syndrome:

A) Telangiectasia	B) Thickened skin
C) Increased sweating	D) Generalised hyper pigmentation
28. A patient having 60 Kg body weight is admitted in burns ICU with 40% total body surface area burns. What is the amount of fluid to be infused in first 8 hours as per Parkland formula?

A) 9600 ml	B) 4800 ml	C) 2400 ml	D) 3200 ml
------------	------------	------------	------------
29. Very early sign or symptom of inadequate oxygenation include:

A) Dyspnoea and hypotension	B) Apprehension and restlessness
C) Cool, clammy skin and cyanosis	D) Diaphoresis
30. Fluid and electrolyte shift that occur during the early emergent phase of burns include:

A) Movement of potassium into vascular space	B) Movement of sodium and water into the interstitial space
C) Haemolysis of RBC	D) Movement of protein into vascular space
31. According to Plan C for management of dehydration, administer-----.

A) 100 ml/Kg of ORS	B) 100 ml/Kg of Ringer Lactate
C) 50 ml/Kg of ORS	D) 50 ml/Kg of Ringer Lactate

32. As per norms of ICDS, the population covered by an Anganwadi centre in rural area is -----.
- A) 1000 B) 5000 C) 7000 D) 3000
33. A three-dimensional model representing a miniature of a large-scale museum:
- A) Simulation B) Diorama C) Puppet show D) Peg board
34. Sleeping sickness is transmitted by:
- A) Aedes mosquito B) Culex mosquito
C) Sand fly D) Tsetse fly
35. Temporary hardness of water is due to the presence of Calcium and magnesium -----.
- A) sulphates B) chlorides
C) nitrates D) bicarbonates
36. Auditory fatigue due to noise exposure is greatest at -----.
- A) 1000 Hz B) 4000 Hz C) 2000 Hz D) 1500 Hz
37. The RNTCP was renamed as the National Treatment Elimination Program (NTEP) in:
- A) 2021 B) 2022 C) 2020 D) 2019
38. The test used to determine whether a person is susceptible to diphtheria:
- A) Shake test B) Schick test
C) Schilling test D) Lepromin test
39. "I place a high priority on having my rights respected." This statement is an example of:
- A) Assertive communication B) Passive communication
C) Aggressive communication D) None of the above
40. An employee should receive orders from only one superior at a time to avoid conflict in an organisation. This refers to the principle of:
- A) Scalar chain B) Unity of direction
C) Unity of command D) Esprit de corps
41. A written statement which provides the requirements, duties and responsibilities of the work to be done is known as:
- A) Job specification B) Job analysis
C) Job description D) Job identification
42. A process of measurement and comparison of healthcare organisations performance against an ideal organisation:
- A) Cost benefit analysis B) Benchmarking
C) Performance budgeting D) Incident review
43. A form of behavior in which an employee modifies his/her performance in response to their awareness of being observed is called ----- effect.
- A) Hawthorne B) Horn C) Pitchfork D) Halo

- 5

53. The primary goal of nursing care after craniotomy is -----.
- Prevention of infection
 - Patient comfort
 - Avoid need for secondary surgery
 - Prevent increased intracranial pressure
54. CSF protein level is normal in ----- type of meningitis.
- Viral
 - TB
 - Bacterial
 - Malignant
55. The plantar flexion of foot developed in patients with prolonged bed rest:
- Equine varus
 - Equine valgus
 - Foot drop
 - Pes varus
56. Inflammation of mucus membrane of mouth:
- Glossitis
 - Gingivitis
 - Stomatitis
 - Halitosis
57. Repeated involuntary passage of urine in children beyond 5 years:
- Nocturia
 - Enuresis
 - Dysuria
 - Polyuria
58. Which of the following is **not** a contraindication for giving enema?
- Increased intracranial pressure
 - Glaucoma
 - Recent prostate surgery
 - Abdominal distension
59. The process of disengaging that occurs before an actual loss or death has occurred is ----- grief.
- Disenfranchised
 - Anticipatory
 - Complicated
 - Perceived
60. The position which is used for examination of rectum:
- Lithotomy position
 - Knee-chest position
 - Prone position
 - Dorsal recumbent position
61. If there is an injury to hypothalamus of brain, it is most likely affect:
- Regulation of body temperature
 - Decision making
 - Regulation of respiration
 - Coordination of body movements
62. ----- is **not** a part of peripheral nervous system.
- Cranial nerves
 - Ganglion
 - Spinal nerves
 - Spinal cord
63. BCG is a:
- Live attenuated vaccine
 - Killed vaccine
 - Toxoid
 - Immunoglobulin

64. Sterilization of endoscope is done by:
 A) Autoclaving B) UV rays
 C) 2% phenol D) 2% gluteraldehyde
65. Covid 19 virus will die very quickly -----.
 A) When exposed to sunlight
 B) At room temperature
 C) At temperature less than room temperature
 D) At relatively low humidity
66. Viral antigens are likely:
 A) Proteins B) Glycoproteins
 C) Lipoproteins D) Both A and B
67. An effective hand sanitizer contains at least ----- of alcohol to kill the corona virus and other germs.
 A) 30 % B) 45 % C) 60 % D) 80 %
68. ----- is an example of incomplete protein.
 A) Gelatine B) Wheat protein
 C) Rice protein D) Egg protein
69. The deficiency of vitamin D results in ----- disease in adults.
 A) Osteoporosis B) Rheumatoid arthritis
 C) Osteomalacia D) Osteomyelitis
70. Daily requirement of protein is ----- gm/kg.
 A) 1 B) 2 C) 1.5 D) 2.5
71. The mineral which act as a co-factor for enzymes:
 A) Iron B) Potassium C) Phosphorous D) Calcium
72. Which of the following is **not** considered as a nutrient?
 A) Vitamins B) Minerals C) Fat D) Fibre
73. Which of the following is a preferred energy source for the body?
 A) Vitamins B) Carbohydrates
 C) Fats D) Fibres
74. Folic acid supplementation reduces the risk of:
 A) Neural tube defects B) Toxaemia of pregnancy
 C) Down syndrome D) Placenta previa
75. Surfactant appears in the amniotic fluid at the gestational age of ----- weeks.
 A) 20 B) 28 C) 32 D) 36
76. Indication for induction of labour is -----.
 A) PIH at term B) Breech presentation
 C) Placenta previa D) Heart disease at term

77. Commonest cause of non engagement at term in primi gravid:
 A) CPD B) Hydramnios
 C) Breech presentation D) Brow presentation
78. Suction evacuation can be done upto ---- weeks.
 A) 6 B) 10 C) 16 D) 20
79. Absolute contraindication for hormone replacement therapy is:
 A) Thrombosis B) Hemorrhage
 C) Fibroadenoma D) Metrorrhagia
80. The first sign of puberty in girl is-----.
 A) Menarchea B) Breast budding
 C) Growth spurt D) pubic hair growth
81. The hormone which is essential for milk production:
 A) Thyroid hormone B) ADH
 C) Oxytocin D) Prolactin
82. Uterus turned inside out is called ----- .
 A) acute inversion of uterus B) cervical dystocia
 C) rupture of uterus D) prolapsed of uterus
83. Umbilical cord contains-----.
 A) 1 artery and 2 veins B) 2 arteries and 1 vein
 C) 2 arteries and 2 veins D) 1 artery and 1 vein
84. A 36-year-old married male presents with extreme orderliness, perfectionism and extreme conscientiousness. He is diagnosed to be a case of----- personality disorder.
 A) Histrionic B) Narcissistic C) Anankastic D) Borderline
85. While eliciting the patellar reflex, the nurse normally expect which of the following movement of leg?
 A) Flexion of leg B) Dorsiflexion of toes
 C) Extension of leg D) Plantar flexion of toes
86. The body temperature in centigrade which is equivalent to 102 degree Farenheit:
 A) 74.4°C B) 102°C C) 126°C D) 38.8°C
87. An irregular rhythm of pulse in which every other beat comes early:
 A) Water hammer pulse B) Pulse alternans
 C) Bigeminal pulse D) Corrigan's pulse
88. Shallow breathing interrupted by irregular periods of apnea:
 A) Biot's respiration B) Cheyne stokes respiration
 C) Hypoventilation D) Kussmaul's respiration

89. A blood borne disease:
 A) Anaemia B) Thalassemia
 C) Haemophilia D) Hepatitis B
90. The process of destroying all vegetative form of bacteria, virus and spores from room and surfaces by exposure to gaseous germicide is called:
 A) Autoclaving B) Hot air sterilization
 C) Radiation D) Fumigation
91. Short febrile periods for few days followed by periods of normal temperature for one or two days is called ---- fever.
 A) Relapsing B) Intermittent C) Remittent D) Irregular
92. Doctor's order for a single dose of medication to be given immediately and only once is:
 A) Prn B) SOS C) Stat D) OD
93. Three pints of Dextrose Normal Saline is ordered for a client over 24 hrs. The rate of flow of fluid is ----- drops/mt.
 A) 0.03 B) 60 C) 16 D) 62.5
94. A nurse has to give 15 Units of Human Regular Insulin (40 U /ml) for a client. How much units of insulin is to be taken in a 100 Units /ml syringe?
 A) 37.5 U B) 15 U C) 6 U D) 30 U
95. Which of the following is secreted by juxta glomerular apparatus of kidney?
 A) Renin B) Secretin C) Glomeruls D) Vasopressin
96. Elbow joint is an example of:
 A) Gliding joint B) Ball and socket joint
 C) Pivot joint D) Hinge joint
97. Abnormal increase in lumbar curvature of vertebral column:
 A) Scoliosis B) Kyphosis
 C) Lordosis D) Pectus excavatum
98. A client with fever will most likely demonstrate -----.
 A) Precordial pain B) Elevated pulse rate
 C) Elevated blood pressure D) Dyspnea
99. The mechanism responsible for long term blood pressure regulation is -----.
 A) Baroreceptors B) Flight or fight response
 C) Capillary fluid shift D) Adjustment of urinary output
100. Excessive alcohol consumption while on warfarin therapy leads to:
 A) Decreased anticoagulation effect
 B) Decreased INR
 C) Increased anticoagulation effect
 D) Increased vitamin K absorption
